FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

GENERAL

The purpose of this Management Discussion and Analysis (“MD&A”) is to explain management’s point of view of the past performance and future outlook of First Americas Gold Corporation (the “Company”). This MD&A also provides information to improve the reader’s understanding of the Company’s financial statements and related notes, and should therefore be read in conjunction with the unaudited condensed interim financial statements of the Company and notes thereto for the three months ended June 30, 2015 (the “Financial Statements”). Additional information on the Company is available on SEDAR and on the Company’s website, www.firstamericasgold.com. All information contained in this MD&A is current as of August 27, 2015, unless otherwise stated.

All financial information in this MD&A has been prepared in accordance with International Financial Reporting Standards (“IFRS”) and all dollar amounts are expressed in Canadian dollars unless otherwise indicated.

FORWARD LOOKING STATEMENTS

Certain sections of this MD&A may contain forward-looking statements.

All statements, other than statements of historical fact, made by the Company that address activities, events or developments that the Company expects or anticipates will or may occur in the future are forward-looking statements, including, but not limited to, statements preceded by, followed by or that include words such as “may”, “will”, “would”, “could”, “should”, “believes”, “estimates”, “projects”, “potential”, “expects”, “plans”, “intends”, “anticipates”, “targeted”, “continues”, “forecasts”, “designed”, “goal”, or the negative of those words or other similar or comparable words. Forward-looking statements may relate to the Company’s future financial conditions, results of operations, plans, objectives, performance or business developments including, among other things, exploration and work programs, drilling plans and timing of drilling, plans for development and facilities construction and timing, method of funding and completion thereof, the performance characteristics of the Company’s mineral properties, drilling results of various projects of the Company, the existence of mineral resources or reserves and the timing of development thereof, projections of market prices and costs, supply and demand for gold, expectations regarding the ability to raise capital and to acquire reserves through acquisitions and/or development, treatment under governmental regulatory regimes and tax laws, and capital expenditure programs and the timing and method of financing thereof. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The estimates and assumptions of the Company contained in this MD&A, which may prove to be incorrect, include, but are not limited to, the various assumptions set forth herein and in the MD&A, or as otherwise expressly incorporated herein by reference as well as: (1) there being no significant disruptions affecting operations, whether due to labour disruptions, supply disruptions, power disruptions, damage to equipment, adverse weather conditions or otherwise; (2) permitting, access, exploration, expansion and acquisitions at the Company’s projects (including, without limitation, land acquisitions for and permitting of exploration plans) being consistent with the Company’s current expectations; (3) prices for and availability of equipment, labor, natural gas, fuel oil, electricity, water and other key supplies remaining consistent with current levels; (4) labour and materials costs increasing on a basis consistent with the Company’s current expectations; and (5) the availability and timing of additional financing being consistent with the Company’s current expectations. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements. Such factors include, but are not limited to: fluctuations in the currency markets; fluctuations in the spot and forward price of gold or certain other commodities (such as diesel fuel and electricity); changes in national and local government legislation, taxation, controls, regulations and political or economic developments in Canada and United States; business opportunities that may be presented to, or pursued by, the Company; the Company’s ability to successfully integrate acquisitions; operating or technical difficulties in connection with exploration or development activities; employee relations;

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

the speculative nature of gold exploration and development, including the risks of obtaining necessary licenses and permits; competition for, among other things, capital, acquisitions of reserves, undeveloped lands and skilled personnel; incorrect assessments of the value of acquisitions; geological, technical, drilling and processing problems; fluctuations in foreign exchange or interest rates and stock market volatility; changes in income tax laws or changes in tax laws and incentive programs relating to the mineral resource industry; and contests over title to properties, particularly title to undeveloped properties. In addition, there are risks and hazards associated with the business of gold exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and gold bullion losses (and the risk of inadequate insurance, or the inability to obtain insurance, to cover these risks). Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Forward-looking statements are provided for the purpose of providing information about management's expectations and plans relating to the future. All of the forward-looking statements made in this MD&A are qualified by these cautionary statements and those made in the Company's other filings with applicable securities regulators in Canada. These factors are not intended to represent a complete list of the factors that could affect the Company and readers should not place undue reliance on forward-looking statements in this MD&A. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

The forward looking statements contained herein are based on information available as of August 27, 2015.

OVERALL PERFORMANCE

The Company was incorporated under the *Business Corporations Act* (British Columbia) (the "BCBCA") on April 3, 2007 under the name "Pannonia Ventures Corp.". The Company's head office and principal address is 800-1199 West Hastings Street, Vancouver, British Columbia, Canada, V6E 3T5. The Company's registered and records office is located at 800 – 1199 West Hastings Street, Vancouver, British Columbia, Canada V6E 3T5.

The Company completed its Qualifying Transaction on January 31, 2012 and, as a result, the Company ceased to be a Capital Pool Company. In connection with the completion of the Qualifying Transaction, the Company changed its name to "First Americas Gold Corporation" and commenced trading as a Tier 2 Mining Issuer on the TSX-V on February 2, 2012 under the new trading symbol "FAC.V". The Company completed its Qualifying Transaction through the closing of an amended and restated option agreement with Aurumbank Incorporated, Watering Hole Productions Inc., and Nevada Pacific Mining Inc., pursuant to which Nevada Pacific and Watering Hole granted the Company an option to acquire a 100% interest, and Aurumbank granted the Company an option to acquire a 50% interest, in their respective interests in certain mineral rights and unpatented mining claims located in the Gold Basin Mining District, located in Mohave County, Arizona. The Company's business is to acquire, explore, and develop interests in mining projects.

In April 2014, the Company was advised by the Optionors of the Gold Basin property that unless the Company returned an executed Quit Claim Deed within an imposed time frame, the Optionors would proceed with judicial action to quiet title to the properties. Refer to Note 11 of the Financial Statements for discussion regarding the dispute.

In June 2014, Roman Friedrich III resigned as a director of the Company.

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

On August 6, 2014, the Company was served a summon, Certificate on Compulsory Arbitration, and Complaint (Quiet Title) stating a lawsuit had been filed against the Company in the Superior Court of the State of Arizona USA regarding the Gold Basin Project in Arizona. While discussions designed to resolve matters between the Company and the Optionors have been initiated, at the time of this filing, no resolution has been reached.

On August 31, 2014, the Company failed to meet its payment obligation under the Chu Chua property option agreement and wrote-down related costs of \$82,079.

In May 2015, Drew Bonnell resigned as the Chief Executive Officer, President and Secretary of the Company. William Macdonald, David Rankin and David McElhanney resigned as directors of the Company. Mr. Bonnell will remain as a director of the Company and David McElhanney will remain as the Chief Financial Officer and Chief Operating Officer of the Company.

In May 2015, Anthony Jackson was appointed as the Chief Executive Officer, President, Secretary and a director of the Company and Kenneth Tollstam was appointed as a director of the Company.

SELECTED INTERIM INFORMATION

As at June 30, 2015, the Company was a Tier 2 Mining Issuer. Accordingly, the Company has not recorded any revenues other than interest earned, and depends upon share issuances to fund its administrative expenses. See the summary of results below:

	Quarters ended June 30,	
	2015 (\$)	2014 (\$)
Revenues	-	-
General and administrative expenses	(32,923)	(37,311)
Other expenses	-	(140)
Net and comprehensive loss	(32,923)	(37,451)
Basic and diluted loss per share	(0.01)	(0.01)
Exploration and evaluation assets	1	111,454
Total assets	8,611	125,361
Working capital deficit	(230,912)	(96,036)
Dividends per share	-	-

At June 30, 2015, the Company had not yet achieved profitable operations and had accumulated losses of \$1,683,391 (March 31, 2015 – \$1,650,468) since inception. These losses resulted in a net loss per share for the three months ended June 30, 2015 of \$0.01 (June 30, 2014 - \$0.01).

At June 30, 2015, the Company had no continuing source of operating revenues and related expenditures. The Company has not paid any dividends on its common shares nor does it have any present intention of paying dividends on its common shares, as it anticipates that all available funds obtained in the foreseeable future will be invested to finance its business activities.

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

RESULTS OF OPERATIONS

As an exploration company, the Company has yet to generate any revenue since its inception from its planned operations.

The operating and administrative expenses for the three months ended June 30, 2015 totaled \$32,923 (2014 - \$37,311), including filing and transfer agent fees of \$265 (2014 - \$905), management and director fees of \$31,500 (2014 - \$29,500), office and miscellaneous expenses of \$500 (2014 - \$1,458), professional fees of \$560 (2014 - \$4,728) and travel and related expenses of \$27 (2014 - \$619).

The table below details the changes in major expenditures for the quarter ended June 30, 2015 as compared to the quarter ended June 30, 2014:

Expenses	Increase/Decrease in Expenses	Explanation for Change
Filing and transfer agent fees	Decrease of \$640	Decreased fees related to less corporate activity.
Management and director fees	Increase of \$2,000	Increased due to a share for debt settlement for a director.
Office and miscellaneous	Decrease of \$958	Decreased as less general corporate activity and cost cutting initiatives.
Professional fees	Decrease of \$4,168	Decreased due to lower legal fees as a result of less corporate activity.

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

SUMMARY OF QUARTERLY RESULTS FOR THE LAST CONSECUTIVE 8 QUARTERS

Historical quarterly financial information derived from the Company's eight most recently completed quarters is as follows:

	Quarters Ended			
	June 30, 2015	March 31, 2015	December 31, 2014	September 30, 2014
	\$	\$	\$	\$
Loss	(32,923)	(44,748)	(44,787)	(124,245)
Loss per share	(0.01)	(0.02)	(0.02)	(0.05)
Weighted average number of shares	2,748,466	2,748,466	2,748,466	2,748,466
	June 30, 2014	March 31, 2014	December 31, 2013	September 30, 2013
	\$	\$	\$	\$
Loss	(37,451)	(89,009)	(311,514)	(70,021)
Loss per share	(0.01)	(0.03)	(0.11)	(0.03)
Weighted average number of shares	2,748,466	2,748,466	2,748,466	2,747,017

The variations in net loss from quarter to quarter are a result of the extent of the amount of administrative expenses needed, due to the amount of activity the Company is incurring on its exploration and evaluation assets, and the amount of write-downs and impairments recorded.

The following one-time events occurred:

- In the quarter ended March 31, 2015, the Company wrote down the Gold Basin property by \$464.
- In the quarter ended September 30, 2014, the Company wrote down the Chu Chua property in the amount of \$82,079 as the Company failed to meet the required payment obligation;
- In the quarter ended March 31, 2014, the Company abandoned the Idaho Property and wrote down related exploration and evaluation property interests of \$37,229; and
- In the quarter ended December 31, 2013, the Company wrote down the Gold Basin Property by \$248,603 as a result of the dispute with the Optionors.

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

SUMMARY OF EXPLORATION PROPERTIES

For the three months ended June 30, 2015, the Company incurred \$Nil in deferred exploration costs compared to \$Nil in deferred exploration costs for the corresponding three months ended June 30, 2014.

The total cumulative acquisition and deferred exploration costs to June 30, 2015 are summarized as follows:

	Gold Basin Property (\$)	Idaho Property (\$)	Chu Chua Property (\$)	Total Balance (\$)
Property acquisition and staking costs	124,635	10,067	10,708	145,410
Exploration expenditures				
Field gear and supplies	-	-	646	646
General administration	2,109	1,267	5,449	8,825
Geological consulting and engineering	37,316	12,600	57,164	107,080
Land claims	-	4,988	-	4,988
Legal fees	1,944	-	-	1,944
Mapping and prospecting	-	-	8,950	8,950
Permits and licenses	82,869	-	-	82,869
Samples and lab analysis	-	-	15,264	15,264
Travel and accommodation	195	8,307	14,122	22,624
B.C. mineral exploration tax credit	249,068	37,229	112,303	398,600
Write down of exploration and evaluation property interests	-	-	(30,224)	(30,224)
	(249,067)	(37,229)	(82,079)	(368,375)
Cumulative deferred exploration costs at June 30, 2015	1	-	-	1

Exploration Update

Due to persistent financial challenges within the industry, the Company is evaluating strategic alternatives on how best to proceed prior to advising on further decisions regarding its exploration programs.

Chu Chua Property

In June 2013 (later amended in July 2013 and June 2014), the Company optioned to earn 100% interest in 61 contiguous mining claims consisting of 11,592 hectares, which comprise the Kamloops Au Cu Property. The property is located in the Kamloops Mining Division, approximately 24 kilometers northeast of Barriere, British Columbia.

The Property is part of the mineral-rich Adams Plateau-Vavenby belt of south-central British Columbia, host of the Harper Creek Deposit (measured and indicated resource of 532.1 MMt grading 0.31% Cu, 0.032 g/t Au, 1.08 g/t Ag; Narcisco and others, 2011) and the Sumatosum Deposit with past production of 14 MM oz silver, 21 M oz gold, 8 M lbs copper, 11 M lbs lead and 21 M lbs zinc from 612 M tons of ore milled.

There are at least seven (7) significant mineral occurrences on the Property and in 2013 the company explored two: a gold showing in Devonian-age rhyolitic porphyry; and a copper anomaly discovered directly south of and contiguous with the Chu Chua massive sulfide copper deposit which has a NI 43-101 compliant inferred resource measuring 2.5 MM tonnes averaging 2% copper, 0.3% zinc, 9.4 g/t silver and 0.5 g/t gold assuming a copper block cut-off grade of 1.0% and 75% of the resource within 100m of the surface (Dufresne and others, 2012); the Company's qualified person has been unable to verify the above information and it is not necessarily indicative of the mineralization on the Property. The gold showing has

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

a strike length approximating 6 km and a width that varies between about 400 and 700 m. The host rocks are silicified, veined and brecciated high level porphyritic felsic intrusions of Devonian age. Wholesale silica replacement, combined with multiple episodes of veining and brecciation make this target appealing. More than 400 prospecting grab samples were collected, several having multi-gram gold values and many containing anomalous to very anomalous gold concentrations. Reconnaissance VLF lines across the target were undertaken to identify massive pyrite zones that may, based on historical drill data, contain multi gram to multi ounce gold concentrations. As well, Ah (humus) soils samples were taken adjacent to rock samples to test the efficacy of this exploration tool as a vector to gold. The copper anomaly located due south of the Chu Chua deposit was identified using Ah (humus) soil samples and VLF (very long frequency) geophysical techniques. In both cases the signatures seen over the Chu Chua deposit were repeated south of the deposit suggesting the possibility of a southward extension. This work was reconnaissance in nature.

The Optionors granted an option to the Company to acquire a 100% interest in the Property on the terms and conditions of the Option Agreement subject to the following:

- (a) Incurring exploration expenditures on the claim as follows:
 - (i) \$125,000 on or before August 31, 2014,
 - (ii) an additional \$475,000 on or before August 31, 2015,
 - (iii) an additional \$650,000 on or before August 31, 2016,
 - (iv) an additional \$750,000 on or before August 31, 2017;

- (b) Issuing shares to the Optionor, in each case, other than the initial share issuance, upon the Company deciding to continue with exploration efforts on the claim, as follows:
 - (i) 33,333 shares on July 5, 2013 (issued at a value of \$10,000),
 - (ii) an additional 50,000 shares thirty calendar days after confirmation of the Company incurring \$125,000 in cumulative exploration expenditures,
 - (iii) an additional 66,667 shares thirty calendar days after confirmation of the Company incurring \$600,000 in cumulative exploration expenditures,
 - (iv) an additional 83,333 shares thirty calendar days after confirmation of the Company incurring \$1,250,000 in cumulative exploration expenditures,
 - (v) an additional 100,000 shares thirty calendar days after confirmation of the Company incurring \$2,000,000 in cumulative exploration expenditures; and

- (c) The Company making a one-time cash payment of \$500,000 to the Optionors thirty calendar days after confirmation that the Company incurred \$2,000,000 in exploration expenditures on or before August 31, 2017 and upon the Company deciding to continue with exploration efforts on the claim.

The Company failed to meet its payment obligation under the option agreement and wrote-down related costs of \$82,079 during the year ended March 31, 2015.

Properties Written Down During Fiscal 2015:

Gold Basin Property

During the year ended March 31, 2015, the Company wrote down the Gold Basin property by \$464.

The Properties comprised approximately 7,700 acres, or almost 12 square miles, of mineral rights and mining claims in North Western Arizona. The area is easily accessible 12 months of the year.

In 2011, a National Instrument 43-101 compliant technical report (the "Technical Report") was prepared on the Properties on behalf of the Company. The Technical Report discussed the relevance of the historical exploration activities at the Properties and the merits of further exploration work. As recommended in the Technical Report, the Company planned to verify the historical results achieved from past exploration efforts on the Properties prior to further work.

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

The verification process commenced with the compilation of the significant body of past data into a technically current and usable GIS database, which could then be reviewed and evaluated to determine the best possible approach for the Company to proceed with activities on the Properties. CDM Smith of Irvine California was engaged to compile the available historical drill data from the Properties and generated a preliminary Vulcan software model of these results. Additional historical exploration data was planned to be added to the current Vulcan model, prior to further exploration decisions.

As otherwise reported, the Company was been advised of internal disputes between shareholders and a director of Aurumbank, one of the Optionors, which are the holders of record to the Properties. In addition, there have been numerous occasions where the director of Aurumbank has failed to respond to repeated requests for information made by the Company. Due to these events, the Company has been unable to obtain access to critical records and technical data regarding the Properties. As a result, the Company has been unable to properly identify mineral exploration targets on the Properties and has been effectively prohibited from pursuing its exploration and development program. The Company has accordingly deferred further activities on the Properties until the dispute is settled. The Company gave notice to the Optionors to this effect on January 25, 2013.

Given the uncertainty in the status of the Option Agreement, the Company decided to write down the property to \$1 as at March 31, 2014.

Idaho Property

In April 2013, the Company staked 33 lode mining claims South East of Salmon, Idaho, Unites States. The Company has commenced with a local initiative in Lemhi County, Idaho. The Company aligned itself with local Lemhi County community leaders and geological experts, Mr. Dennis Krasowski MSc, P Geo and Mr. Brian Brewer BSc, P Geo. The purpose of this alignment/association was to establish a locally based mineral management, exploration, and development team in the County, which can then be engaged with the many local mineral property owners resident in the region.

The intention was to aggregate many of the smaller scale properties existing, some of which reportedly held historic non-compliant mineralized resources, into a collective total that over time, would prove to be economically feasible to develop.

During the year ended March 31, 2014, the Company abandoned this property and wrote-down related exploration and evaluation property interests of \$37,229.

Quality Assurance/Quality Control

Robert I. Thompson, PhD, P Eng., who is the Company's Qualified Person as defined under NI 43-101 and a director of the Company has reviewed and approved the contents of the Discussion on Properties section above.

LIQUIDITY, FINANCIAL POSITION, AND CAPITAL RESOURCES

The Company has financed its operations to date through the issuance of common shares. The Company continues to seek capital through various means including the issuance of equity and/or debt. As at June 30, 2015, the Company's liquidity and capital resources were as follows:

	June 30, 2015	March 31, 2015
	\$	\$
Cash and cash equivalents	6,220	7,246
Receivables	669	1,098
Prepaid expenses and deposits	848	848
Total current assets	7,737	9,192
Payables and accrued liabilities	238,649	207,252
Working deficit	(230,912)	(198,060)

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

The Company's operations consist of acquisition, maintenance, and exploration of mineral properties. The Company's financial success will be dependent on the extent to which it can discover new mineral deposits.

As at June 30, 2015, the Company had cash of \$6,220 (March 31, 2015 - \$7,246). As at June 30, 2015, the Company had a working deficit of \$230,912 (March 31, 2015 - \$198,060).

The Company's continuation as a going concern is dependent on its ability to raise equity capital or borrow debt to acquire new mineral projects and meet current working capital requirements. See "Risks and Uncertainties".

OFF BALANCE SHEET ARRANGEMENTS

The Company did not have any off-balance sheet arrangements as at June 30, 2015 or as of the date of this report.

RELATED PARTY TRANSACTIONS

During the three months ended June 30, 2015, the Company entered into the following transactions with key management personnel (senior officers and directors).

- a) As at June 30, 2015, \$Nil (March 31, 2015 - \$173,500) was included in accounts payable and accrued liabilities owing to an officer and director of the Company.
- b) As at June 30, 2015, a loan of \$27,500 was received from Anthony Jackson, the CEO and President of the Company. There were no specific terms of interest or repayment on this loan.

Below is a summary of key management personnel compensation:

	For the three months ended June 30,	
	2015	2014
Management and director fees	\$ 31,500	\$ 29,500

In accordance with IAS 24, key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company directly or indirectly, including directors (executive and non-executive) of the Company.

RISKS AND UNCERTAINTIES

The business and operations of the Company are subject to numerous risks, many of which are beyond the Company's control. The Company considers the risks set out below to be some of the most significant to potential investors in the Company, but not all of the risks associated with an investment in securities of the Company. If any of these risks materialize into actual events or circumstances or other possible additional risks and uncertainties of which the Company is currently unaware or which it considers to be material in relation to the Company's business actually occur, the Company's assets, liabilities, financial condition, results of operations (including future results of operations), business and business prospects, are likely to be materially and adversely affected. In such circumstances, the price of the Company's securities could decline and investors may lose all or part of their investment.

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

Exploration, Development and Operating Risks

The Company has not yet determined whether their mineral properties contain economically recoverable reserves and, therefore, has not generated any revenues from production. The recovery of expenditures on mineral properties and the related deferred exploration expenditures are dependent on the existence of economically recoverable mineralization, the ability of the Company to obtain financing necessary to complete the exploration and development of the Properties, and upon future profitable production, or alternatively, on the sufficiency of proceeds from disposition. Mineral exploration is highly speculative in nature, involves many risks and frequently is non-productive. There is no assurance that exploration efforts will be successful.

Risk of Potential Litigation

The Company has received correspondence from a group of shareholders of Aurumbank Incorporated in which such shareholders have notified the Company that they have commenced a lawsuit against a current director of Aurumbank alleging breach of fiduciary duty against such director. Although no such threat of litigation has been made against the Company, the Company may be included as a party in such litigation and portions of the Properties may become the subject of any such lawsuit. Such litigation may be time consuming and costly, and, as with all litigation, there is no guarantee of success. Should any such litigation be determined adversely to the Company, such litigation may have a material and adverse effect on the Company's ongoing operations and financial condition.

On August 6, 2014, the Company was served a summon, Certificate on Compulsory Arbitration, and Complaint (Quiet Title) stating a lawsuit had been filed against the Company in the Superior Court of the State of Arizona USA regarding the Gold Basin Project in Arizona. While discussions designed to resolve matters between the Company and the Optionors have been initiated, at the time of this filing, no resolution has been reached.

Substantial Capital Requirements and Liquidity

Substantial additional funds for the establishment of the Company's planned mining operations will be required. No assurances can be given that the Company will be able to raise the additional funding that may be required for such activities, should such funding not be fully generated from operations. Mineral prices, environmental rehabilitation or restitution, revenues, taxes, transportation costs, capital expenditures and operating expenses and geological results are all factors which will have an impact on the amount of additional capital that may be required. To meet such funding requirements, the Company may be required to undertake additional equity financing, which would be dilutive to shareholders. Debt financing, if available, may also involve restrictions on financing and operating activities. There is no assurance that additional financing will be available on terms acceptable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and pursue only those projects that can be funded through cash flows generated from its existing operations, if any.

Fluctuating Mineral Prices

The economics of mineral exploration are affected by many factors beyond the Company's control, including commodity prices, the cost of operations, variations in the grade of minerals explored and fluctuations in the market price of minerals. Depending on the price of minerals, the Company may determine that it is impractical to continue a mineral exploration operation. Mineral prices are prone to fluctuations and the marketability of minerals is affected by government regulation relating to price, royalties, allowable production and the importing and exporting of minerals, the effect of which cannot be accurately predicted. There is no assurance that a profitable market will exist for the sale of any minerals found on the Properties.

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

Regulatory, Permit and License Requirements

The future operations of the Company require permits from various governmental authorities, and such operations are and will be governed by laws and regulations concerning exploration, development, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, site safety and other matters. Companies engaged in the exploration and development of mineral properties generally experience increased costs and delays in development and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that all permits which the Company may require for facilities and the conduct of exploration and development operations on the Properties will be obtainable on reasonable terms, or that such laws and regulations will not have an adverse effect on any exploration or development project which the Company might undertake.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in exploration and development operations may be required to compensate those suffering loss or damage by reason of the exploration and development activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations. Amendments to current laws, regulations and permits governing operations and activities of mineral companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or exploration and development costs, or require abandonment or delays in the development of new or existing properties.

Title to Properties

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. The Company cannot give an assurance that title to the Properties will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. A successful claim that the Optionors or the Company, as the case may be, does not have title to the Properties could cause the Company to lose any rights to explore, develop and mine any minerals on the Properties without compensation for its prior expenditures relating to the Properties.

Competition

The mineral exploration and development industry is highly competitive. The Company will have to compete with other mining companies, many of which have greater financial, technical and other resources than the Company, for, among other things, the acquisition of minerals claims, leases and other mineral interests as well as for the recruitment and retention of qualified employees and other personnel. Failure to compete successfully against other mining companies could have a material adverse effect on the Company and its prospects.

Reliance on Management and Dependence on Key Personnel

The success of the Company will be largely dependent upon the performance of its directors and officers and the ability to attract and retain key personnel. The loss of the services of these persons may have a material adverse effect on the Company's business and prospects. The Company will compete with numerous other companies for the recruitment and retention of qualified employees and contractors. There is no assurance that the Company can maintain the service of its directors and officers or other qualified personnel required to operate its business. Failure to do so could have a material adverse effect on the Company and its prospects.

MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

Environmental Risks

The Company's exploration and appraisal programs will, in general, be subject to approval by regulatory bodies. Additionally, all phases of the mining business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions and state and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with mining operations. The legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs.

Local Resident Concerns

Apart from ordinary environmental issues, the exploration, development and mining of the Properties could be subject to resistance from local residents that could either prevent or delay exploration and development of the Properties.

Conflicts of Interest

Certain of the directors and officers of the Company will be engaged in, and will continue to engage in, other business activities on their own behalf and on behalf of other companies (including mineral resource companies) and, as a result of these and other activities, such directors and officers may become subject to conflicts of interest. The BCBCA provides that in the event that a director has a material interest in a contract or proposed contract or agreement that is material to an issuer, the director shall disclose his interest in such contract or agreement and shall refrain from voting on any matter in respect of such contract or agreement, subject to and in accordance with the BCBCA. To the extent that conflicts of interest arise, such conflicts will be resolved in accordance with the provisions of the BCBCA.

Uninsurable Risks

Exploration, development and production operations on mineral properties involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, fires, floods, earthquakes and other environmental occurrences, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although precautions to minimize risk will be taken, operations are subject to hazards that may result in environmental pollution and consequent liability that could have a material adverse impact on the business, operations and financial performance of the Company. It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks as a result of high premiums or other reasons. Should such liabilities arise, they could have an adverse impact on the Company's results of operations and financial condition and could cause a decline in the value of the Company's shares.

Litigation

The Company and/or its directors may be subject to a variety of civil or other legal proceedings, with or without merit.

MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates. Estimates are reviewed on an ongoing basis based on historical experience and other factors that are considered to be relevant under the circumstances. Revisions to estimates on the resulting effects of the carrying amounts of the Company's assets and liabilities are accounted for prospectively.

All of the Company's significant accounting policies and estimates are included in Note 2 of its Financial Statements for the three months ended June 30, 2015. The most significant accounts that require estimates as the basis for determining the stated amounts include recoverability of exploration and evaluation assets, the valuation of share-based compensation and recognition of deferred tax assets and liabilities as follows:

Economic recoverability and probability of future economic benefits of exploration and evaluation assets

Management has determined that exploration, evaluation, and related costs incurred which were capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including, geologic and other technical information, a history of conversion of mineral deposits with similar characteristics to its own properties to proven and probable mineral reserves, the quality and capacity of existing infrastructure facilities, evaluation of permitting and environmental issues and local support for the project.

Valuation of share-based compensation

The Company uses the Black-Scholes Option Pricing Model for valuation of share-based compensation. Option pricing models require the input of subjective assumptions including expected price volatility, interest rate, and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's earnings and equity reserves.

Income taxes

In assessing the probability of realizing income tax assets, management makes estimates related to expectation of future taxable income, applicable tax opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified.

ACCOUNTING PRONOUCEMENTS NOT YET ADOPTED

There were no changes to the Company's accounting policies during the three months ended June 30, 2015.

A number of new standards, amendments to standards and interpretations applicable to the Company are not yet effective for the three months ended June 30, 2015 and have not been applied in preparing these financial statements. The Company is currently considering the possible effects of the new and revised standards which will be effective to the Company's financial statements for the year ending March 31, 2016 or later:

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

- a) *IFRS 9 – Financial Instruments: Classification and Measurement* applies to classification and measurement of financial assets and liabilities as defined in IAS 39. It is tentatively effective for annual periods beginning on or after January 1, 2018 with early adopted permitted. The Company does not expect any effect on its financial statements from the adoption of this standard.
- b) *IFRS 7 – Financial Instruments: Disclosures* amended to require additional disclosure on transition from IAS 39 to IFRS 9.

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The fair value of the Company's receivables and accounts payable and accrued liabilities approximate their carrying values. The Company's other financial instruments, being cash, are measured at fair value using Level 1 inputs.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts. The Company has deposited the cash with its bank from which management believes the risk of loss is remote. The majority of the Company's receivables are amounts receivable from Canada Revenue Agency for excise tax credits and as such, the credit risk is minimal.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise the required capital through future equity or debt issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning, and approval of significant expenditures and commitments.

Market Risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk, from time to time, on its cash balances. Surplus cash, if any, is placed on call with financial institutions and management actively negotiates favourable market related interest rates.

Capital Management

The Company defines capital as the Company's shareholder's equity (deficit). The Company's objectives when managing capital is to ensure that there is sufficient capital to minimize liquidity risk and to continue as a going concern. See Note 9 of the Financial Statements for the three months ended June 30, 2015 for further discussion.

DISCLOSURE OF DATA FOR OUTSTANDING COMMON SHARES, OPTIONS AND WARRANTS

Common Shares

As at June 30, 2015 and at the date of this report, the Company had 2,748,466 common shares issued and outstanding.

	As at June 30, 2015	As at August 27, 2015
Common shares	2,748,466	2,748,466
Stock options	465,832	465,832
Share purchase warrants	518,333	518,333

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

Stock Options

The Company has granted incentive options to certain directors, officers, and consultants of the Company. As of the date of this report, there are four tranches of options as shown below:

Options outstanding and exercisable	Exercise price	Expiry date
	\$	
3,333	0.75	April 11, 2017
175,833	0.60	February 10, 2021
58,333	0.60	January 27, 2022
228,333	0.75	March 23, 2022
<u>465,832</u>		

Share Purchase Warrants

As at the date of this report, the Company has one tranche of warrants outstanding as shown below:

Warrants outstanding	Exercise price	Expiry date
518,333	\$0.90	July 27, 2015

Escrow Shares

As at June 30, 2015, Nil (March 31, 2015 - Nil) shares of the Company are held in escrow.

SUBSEQUENT EVENTS

Subsequent to the period ended June 30, 2015, the Company entered into an option agreement to acquire an undivided 100% interest in and to certain mineral properties, together with the surface rights, mineral rights, personal property and permits associated therewith, located in the Slocan mining district of British Columbia and known as the Green Horn Property. The option is exercisable by the Company paying to the optionors an aggregate amount of \$375,000, as follows:

- \$2,500 upon signing;
- \$7,500 upon exchange acceptance of the Green Horn property acquisition as the company's principal property;
- \$15,000 on or before the first anniversary date of the agreement;
- \$20,000 on or before the second anniversary date of the agreement;
- \$30,000 on or before the third anniversary date of the agreement;
- \$300,000 on or before the fourth anniversary date of the agreement.

Upon exercise of the option by payment of the total purchase price of \$375,000, the Company will own 100% of the property and all attendant mining rights to the claims subject to a 3% Net Smelter Royalty of which 1% may be purchased by the Company for \$1,000,000.

The option agreement is subject to the approval of the TSX-V.

Subsequent to the period ended June 30, 2015, the TSX-V has accepted for filing the Company's proposal to issue 550,000 shares at a deemed value of \$0.05 to settle outstanding debt for \$27,500.

FIRST AMERICAS GOLD CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE THREE MONTHS ENDED JUNE 30, 2015

Subsequent to the period ended June 30, 2015, the Company closed a non-brokered private placement to raise gross proceeds of \$110,000 by issuing 2,200,000 common shares at a price of \$0.05 per common share.

OTHER MD&A REQUIREMENTS

Additional information relating to the Company may be found on or in:
